

Systems Thinking and Tools of the Learning Organization

for Executives, Managers, Trainers looking for a powerful leadership development experience

Dates: November 19-20 and December 10, 2016 (follow-up session after 3 weeks of application)

Time: 9:00 a.m. – 5:30 p.m.

Venue: OCCI Center for Learning, 6th Floor Emerald Building, No.24 F. Ortigas Jr. Road, Ortigas Center

What is Systems Thinking?

Systems Thinking integrates the various parts of the system in a way that maximizes organizational effectiveness. ...it provides a different way of looking at problems and goals not as isolated events but as components of larger structures.

- Peter Senge, Author, The Fifth Discipline,
The Art of the Learning Organization

Why attend the workshop?

- ✓ Constant use of these **systems thinking** tools in the workplace transforms attitude, beliefs and behaviour that builds the foundation for a learning culture, sustainable over time;
- ✓ Participants will have hands-on experience on Action Learning and the Theory U innovation lab methodology to co-create work process improvements while enhancing their communication and collaboration skills;
- ✓ Participants will develop their critical thinking capacities to become better Leaders committed to creating better results in the workplace.

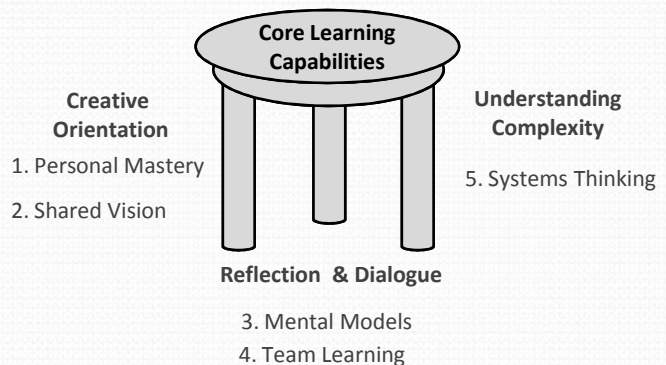

Facilitators: Marisol Lopez and Bel Villavicencio

Both have more than 32 years of continuous learning and practice in Leadership and Organizational Transformation. They are co-founders and Board Directors of SoL Phils., The World Institute for Action Learning (WIAL) Phils., and The Rizal Academy for Innovation and Leadership (TRAIL).

Why is Systems Thinking important?

The world of business today is complex and growing more complex every day. Unfortunately, our brain is programmed for linear thinking, making problem solving and decision making difficult and ineffective. **Systems thinking** provides visual and analytical tools to assist 21st century organizations effectively deal and adapt to change.
